

# Contents

## Contents of Volume A

Chapter 1. Morphology and Systematics

Chapter 2. Anatomy and Physiology

Chapter 3. Reproduction, Cytogenetics and Development

Chapter 4. Biology

Chapter 5. Aphids and their Environment

Chapter 6. Evolution

Chapter 7. Organization (Structure) of Population and Species, and Speciation

## Contents of Volume B

Chapter 8. Techniques

Chapter 9. Natural Enemies

## Contents of Volume C

Chapter 10. Damage . . . . .	1
<b>10.1 The Responses of Plants to the Feeding of Aphidoidea: Principles, by P.W. Miles . . . . .</b>	<b>1</b>
Conservation of the food resource . . . . .	1
Factors influencing the specificities of responses . . . . .	2
Interaction of mechanical and chemical stimuli. . . . .	2
Immediate physiological responses. . . . .	3
Some uncertainties concerning salivary influence. . . . .	3
Phytotoxic reactions: to salivary toxins or depletion of assimilate?. . . . .	4
Systemic and localized reactions . . . . .	5
Cecidogenic redifferentiation . . . . .	5
The insect as a localized nutrient "sink". . . . .	6
Respiratory consequences of a nutrient sink . . . . .	7
Defensive reactions in galled tissues. . . . .	7
Phytotoxic reactions characterized . . . . .	7
Experimental simulation of natural responses . . . . .	8
Hormones as cecidogens . . . . .	8
Amino acids as cecidogens . . . . .	10
Enzyme systems as cecidogens . . . . .	10
Enzyme inhibitors as cecidogens . . . . .	11
Respiratory influences in cecidogenesis . . . . .	12
Behavioural influences in cecidogenesis . . . . .	13
Rejection of involvement of neoplasia and microbial intervention . . . . .	13
Interactions of the responsiveness of the plant with behavioural and chemical specificities of the insect . . . . .	14
Cecidogenesis seen as a progressive influence on biochemical equilibria . . . . .	14
References. . . . .	16
<b>10.1.1 Specific Responses and Damage caused by Aphidoidea, by P.W. Miles . . . . .</b>	<b>23</b>
Introduction. . . . .	23
Damage caused by nutrient drain . . . . .	23
Damage related to the sensitivity of the plant . . . . .	24
Chlorosis caused by aphidids . . . . .	25
Systemic effects ascribed to aphidid toxins . . . . .	25
Localized effects ascribed to aphidid toxins. . . . .	26
Growth distortions caused by aphidids. . . . .	27
Damage by aphidids summarized . . . . .	27
Galls caused by the woolly aphid of apple . . . . .	28
Pemphigid galls on <i>Populus</i> . . . . .	29
Damage by pemphigids to secondary hosts . . . . .	29
Adelgid galls on spruce. . . . .	32
Adelgid attacks on needles and shoots of secondary hosts . . . . .	34

Attacks by the balsam woolly aphid on its secondary hosts . . . . .	35
Defensive reactions in woody tissues to the feeding of adelgids . . . . .	36
Galls of the grape phylloxera . . . . .	36
Galling by other phylloxerids . . . . .	40
Galls due to other Aphidoidea. . . . .	40
Cecidogenesis summarized . . . . .	40
References. . . . .	42
<b>10.2 Crop Loss Assessment, by P.W. Wellings, S.A. Ward, A.F.G. Dixon and R. Rabbinge . . . . .</b>	<b>49</b>
Introduction . . . . .	49
Defining yield and loss . . . . .	49
Production levels and production systems . . . . .	52
Production levels . . . . .	52
Production systems. . . . .	52
Injury and damage . . . . .	53
Assessing crop loss . . . . .	54
Laboratory, glasshouse and cage experiments . . . . .	54
Field experiments . . . . .	55
Explaining and forecasting crop loss. . . . .	57
Conclusions . . . . .	60
References. . . . .	61
Appendix - Production loss attributable to aphids . . . . .	63
<b>10.3 Viruses Transmitted by Aphids, by E.S. Sylvester . . . . .</b>	<b>65</b>
Introduction . . . . .	65
Non-persistent transmission. . . . .	65
Potyviruses . . . . .	67
Potexviruses. . . . .	67
Carlaviruses. . . . .	68
Multicomponent RNA viruses. . . . .	69
Semi-persistent transmission . . . . .	71
Bimodal transmission. . . . .	71
Closteroviruses . . . . .	72
Caulimoviruses . . . . .	73
Unclassified viruses . . . . .	73
Persistent transmission. . . . .	74
Luteoviruses. . . . .	74
Unclassified viruses . . . . .	75
Propagative transmission . . . . .	76
Plant rhabdoviruses . . . . .	76
Epidemiology and management of aphid-borne viruses . . . . .	77
Elimination of virus sources . . . . .	79
Isolation from virus sources. . . . .	80
Crop manipulation . . . . .	81
Miscellaneous methods . . . . .	82
References. . . . .	83
<b>Chapter 11. Control of Aphids . . . . .</b>	<b>89</b>
<b>11.1 Chemical Control, by A. Schepers . . . . .</b>	<b>89</b>
Introduction . . . . .	89
Aphids and aphicides. . . . .	89
Selectivity. . . . .	90
Systemic activity. . . . .	90
Residual activity and persistence . . . . .	90
Rapid action. . . . .	90
Low phytotoxicity . . . . .	91
Application of aphicides . . . . .	91
Chemical control to reduce direct damage . . . . .	91
Solanaceae . . . . .	91
Gramineae. . . . .	93
Chenopodiaceae . . . . .	96
Leguminosae . . . . .	97
Cruciferae. . . . .	99
Compositae . . . . .	100

Rosaceae . . . . .	101
Malvaceae. . . . .	103
Miscellaneous . . . . .	103
Chemical control to reduce virus diseases . . . . .	104
Solanaceae . . . . .	104
Gramineae. . . . .	106
Chenopodiaceae . . . . .	107
Leguminosae . . . . .	109
Cruciferae. . . . .	110
Compositae . . . . .	110
Rosaceae . . . . .	110
Malvaceae. . . . .	111
Miscellaneous . . . . .	111
References. . . . .	112
Solanaceae . . . . .	112
Gramineae. . . . .	114
Chenopodiaceae . . . . .	115
Leguminosae . . . . .	116
Cruciferae. . . . .	118
Compositae . . . . .	119
Rosaceae . . . . .	119
Malvaceae. . . . .	120
Miscellaneous . . . . .	121
<b>11.1.1 Resistance to Aphids to Insecticides, by A.L. Devonshire . . . . .</b>	<b>123</b>
Occurrence of insecticide-resistant aphids . . . . .	123
The biochemical nature of resistance in aphids . . . . .	125
<i>Myzus persicae</i> . . . . .	125
<i>Phorodon humuli</i> . . . . .	128
<i>Aphis gossypii</i> . . . . .	128
Karyotype and instability of resistance in <i>M. persicae</i> . . . . .	129
Detailed studies of resistant populations of <i>M. persicae</i> . . . . .	131
The future. . . . .	134
References. . . . .	135
<b>11.2 Biological Control of Aphids, by M. Carver. . . . .</b>	<b>141</b>
Definition and scope . . . . .	141
Some procedures and principles of biological control . . . . .	142
History of biological control, with special reference to aphids . . . . .	143
Increased need for biological control . . . . .	149
Aphids as candidate pests for biological control . . . . .	151
Population dynamics . . . . .	151
Limitations of adventives . . . . .	151
Heteroecy . . . . .	151
Virus vectors . . . . .	152
Dispersive vehicles . . . . .	153
The control agents . . . . .	154
Multilateral control . . . . .	154
Multiple introductions . . . . .	156
Ants . . . . .	156
The exotic environment. . . . .	156
Existent entomophaga . . . . .	156
Invading species . . . . .	158
An example: Australia . . . . .	158
Aphids as controllers of weeds . . . . .	160
Assessment . . . . .	160
References. . . . .	161
<b>11.2.1 Biological Control in the Open Field, by R.D. Hughes. . . . .</b>	<b>167</b>
Introduction. . . . .	167
The practice of biological control of aphids . . . . .	168
Step 1. Characterisation of target aphid and its environment . . . . .	168
Step 2. Appropriateness of biological control, types of enemy and specific approach . . . . .	173
Step 3. Selection of the natural enemy . . . . .	175
Step 4. Import, quarantine procedures, identification and examination . . . . .	175

	Step 5. Release of natural enemies . . . . .	177
	Step 6. Establishment. . . . .	181
	Step 7. Assessment of impact . . . . .	183
	The ecological attributes of a successful natural enemy . . . . .	186
	An analysis of attempts to biologically control target aphid species . . . . .	187
	Conclusions . . . . .	192
	References. . . . .	194
<b>11.2.2</b>	<b>Biological Control in Greenhouses, by P.M.J. Ramakers . . . . .</b>	<b>199</b>
	Introduction . . . . .	199
	Parasitoids . . . . .	200
	Predators . . . . .	202
	Fungi . . . . .	204
	Summary . . . . .	205
